Morningstar[®] Managed Portfolios[™]

High-quality discretionary portfolios built with investors' needs in mind

For Investment Adviser Use Only

“We leverage our depth of resources, proprietary research and investing expertise to build world-class investment strategies designed to deliver great investment outcomes for investors.”

Daniel Needham, President and Chief Investment Officer,
Investment Management

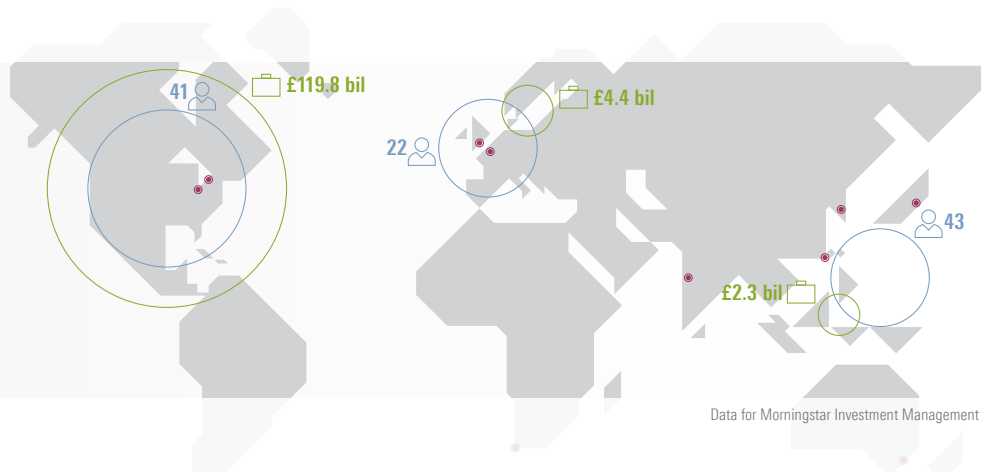

“Our managed portfolios emerge from a legacy of asset-allocation research, combined with active management as an equally important driver of long-term returns.”

Dan Kemp, Chief Investment Officer, EMEA
Morningstar Investment Management Europe Ltd

Our Investment Team

Expertise You Can Trust

Morningstar is a leading provider of independent investment research. Financial advisers and other investment professionals turn to Morningstar for tools that help them research, analyse and present their investment ideas.

Drawing from our global resources, Morningstar Investment Management Europe has developed Morningstar® Managed Portfolios™. Financial advisers use the portfolios to help clients reach their financial goals.

We combine risk profiling, renowned asset-allocation research, shrewd investment selection and professional investment expertise in our Morningstar Managed Portfolios. We use unbiased, objective research from Morningstar to create a range of portfolio options for clearly defined risk profiles.

Each portfolio we create is built for the long term and managed with a keen eye on risk. Our managed portfolio services can help enhance your investment offerings, strengthen client relationships and streamline your business.

Together, we bring your clients the best of both worlds: a plan that you've tailored to their goals with the advantages of professional portfolio management.

Global Investment Management, Local Expertise

Our investment professionals share an international perspective that is informed by local-market knowledge and guided by consistent global principles to craft solutions that cater to the unique needs of their markets. Our UK-based team includes experienced portfolio managers, dedicated asset-allocation specialists and an investment operations team, which helps foster cohesive and agile decision-making and strategic consistency.

Solutions for Diverse Client Needs

Our platform-based discretionary portfolios are designed to serve a diverse range of client needs.

- ▶ **Income** portfolios are intended to provide a stable income in the context of attractive risk-adjusted returns. By focusing on income stability (not just the current yield), our service can provide realistic and risk-aligned income portfolios you can use as part of a long-term investment plan for your clients.
- ▶ **Real Return** portfolios are designed to deliver returns above inflation and increase the real worth of a client's capital. We do this by investing in an unconstrained, diversified portfolio of assets that are fundamentally undervalued, overlooked or underappreciated.
- ▶ **Active** portfolios use long-term strategic asset allocation for diversification. They span equities, fixed-income and alternative investments, providing exposure to a broad range of asset classes that can be weighted according to our expectations for risk and returns.

▶ **Passive** portfolios are the purest reflection of our asset-allocation strategy. Because of their straightforward composition, passive investments do not face the same possibility of investment style drift as vehicles under active management. Our passive series features exact expressions of our asset-allocation targets for each risk level.

Available to a Range of Investors

Morningstar Managed Portfolios have no minimum investment levels, giving more of your clients access to our service and saving you the time and expense of juggling providers based on client assets. Our competitive fee structure can make it easier for you to justify the value of your advice to clients and prospects. Advisers who use our portfolios receive high-quality ongoing support including regular performance and market updates and access to client account representatives.

Our Process

The Morningstar Difference

Rigorous Portfolio Construction

By focusing the resources of our global business on a small number of discretionary portfolios, we set out to create high-quality options for long-term investment plans.

Our approach to portfolio construction builds on our 30-plus years of asset-allocation research to create strategic models that use bespoke capital-market assumptions.

Tactical asset-allocation decisions are based on risk and expected portfolio return. They are backed by diligent research, expert opinion and independent fund research from Morningstar.

Disciplined Risk Management

Each portfolio targets a consistent level of risk across the market cycle. Our risk-tolerance questionnaire is tied to the portfolios' asset allocations. We provide this to you to give directly to clients to help minimise the chance for a mismatch with your clients' preferences.

Our investment team also subjects portfolios to rigorous oversight, keeping a close eye on each portfolio to make sure it remains in line with its targets.

World-Class Manager Research

The Morningstar analyst team is one of the largest and most experienced fund research teams in the UK market, and it shares information with Morningstar's professionals around the world. Our investment professionals use independent data from Morningstar and regular face-to-face meetings with investment managers to identify what we believe to be the high-quality funds that best reflect the strategies of our investment solutions.

Our strategies aim to create better outcomes for you and your clients by combining independent research from our global team of analysts with portfolio construction informed by our industry-leading asset-allocation research.

Inside Our Investment Process

We create and maintain our portfolios through this ongoing five-step process.

Communication to Support Your Clients

The Morningstar Managed Portfolios team is dedicated to providing you the information, materials and support you need to build client relationships and expand your business.

You'll receive:

- ▶ Direct communications about portfolio changes and the reasons behind them so you're always informed and able to explain these to your clients.
- ▶ Quarterly webinars to provide you with portfolio updates.
- ▶ Access to a dedicated relationship team to answer day-to-day queries.
- ▶ Access to portfolio managers to address any questions or concerns.
- ▶ Regular, detailed reporting that shows you the status of our models and their performance.

Nobody knows what's important to your clients like you do. Some of our communications are designed for you to share directly with your clients to complement your advice and provide clear explanations of their portfolios. You can use our communication materials to inform client discussions, build client trust and foster long-term relationships.

Risk Warning

It is important to note that investments in securities involve risk and will not always be profitable. Morningstar Investment Management Europe does not guarantee that the results of its investment decisions or the objectives of the portfolio will be achieved. Morningstar Investment Management Europe does not guarantee that negative returns can or will be avoided in any of its portfolios. An investment made in a security may differ substantially from its historical performance and as a result, portfolios may incur a loss. Past performance is no guarantee of future results.

Morningstar's Investment Management Group

Any use of the sole term Morningstar in this document refers to Morningstar, Inc. Morningstar's Investment Management group comprises Morningstar, Inc.'s registered entities worldwide, including the United Kingdom. Morningstar Investment Management Europe Limited is authorised and regulated by the Financial Conduct Authority to provide services to professional clients and is the entity providing the discretionary management services.
