

Liontrust MPS Growth 4

Objective and strategy

To provide long-term (greater than five years) capital growth through a strategic asset allocation that has a broadly even split exposure to lower risk asset classes such as fixed interest and cash or cash equivalents and higher risk asset classes such as equities, property and absolute return strategies (these may include higher risk investments).

This performance is of the model portfolio and may differ from the actual returns received by clients. Please refer to the 'Important information' section. *Expected Volatility is expressed as the annualised standard deviation of monthly returns. **Since launch figures are from 31 May 2014.

You should remember that past performance is not a guide to future performance. The portfolio's investments are subject to normal fluctuations and other risks inherent when investing in securities. There can be no assurance that any appreciation in the value of investments will occur. The value of investments and any income derived from them may fall as well as rise and investors may not get back the original amount they invested.

It is not an invitation to subscribe and is only intended to provide information and opinion. Nothing contained within this document constitutes investment, legal, tax or any other advice. It should not be relied upon when making an investment or other decision. Any performance shown represents model portfolios which are periodically restructured and/or rebalanced. Although the model portfolios are applied to a client's account, the actual returns may vary from the model returns shown. In addition, portfolio performance is quoted net of cost of investment but gross of fees - i.e. the OCF of the underlying portfolio investments is taken into account but the Investment Management Fee payable to Liontrust is not, so client returns will be lower than the returns shown in this document. Returns do not take account of platform, product provider or Adviser fees, details of which can be found in the Liontrust Managed Portfolio Service Brochure. Any figures shown have not been externally audited. All figures in this document are sourced from Lipper and are total return in steriling.

The asset allocation information provided represents our model portfolios, please note that the asset allocation of a client's individual portfolio may differ. The portfolio holdings represent holdings in the portfolio as at 31 March 2017. The actual holdings may differ from the above list at any other date. Due to rounding the figures may not add up to 100%.
